

NOISE COMPLAINTS AND INFORMATION SERVICE

CAMDEN AIRPORT 2019 COMPLAINANT REVIEW

There were 12 individual complainants during the 2019 calendar year. This is a decrease from 17 complainants in 2018 and a decrease from 2017.

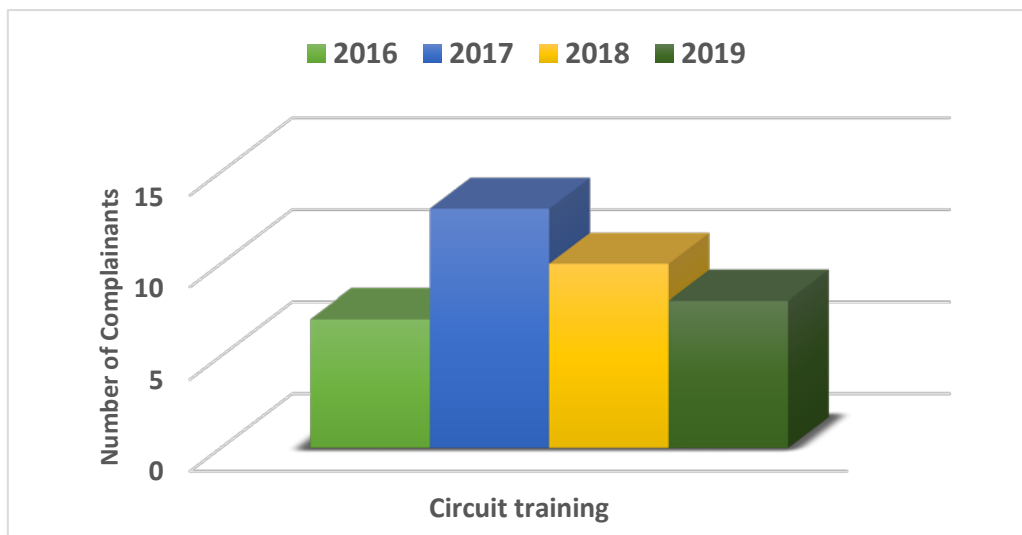

Chart 1: Comparison of complainant numbers for each quarter 2016 to 2019.

Issues

The main issue remains fixed wing circuit training affecting 67 percent of complainants. Sport Aviation operations, aerobatic and ultra-light activity disturbed three complainants and normal operations to and from the airport, one complainant.

Chart 2: Circuit training and number of complainants affected 2016 to 2019

Suburbs

Six separate suburbs recorded complainants during 2019. Four of which recorded a single complainant.

Cobbitty and Ellis Lane each recorded four complainants. Fixed wing circuit training disturbed all of the Cobbitty residents and two of the Ellis Lane residents. Sport aviation activity disturbed the other Ellis Lane residents.

The other suburbs were Elderslie, Harrington Park, Kirkham and Lakesland.

The following chart provides a comparison of the suburbs recording the most complainants over the past few years, with a comparison of complainant numbers with 2016 to 2018.

Chart 3: Suburbs recording the most complainants 2016 to 2019.
